Allegations of deforestation in Leuser Ecosystem in Indonesia (Aceh and North Sumatra).

Greenpeace report Nov. 2019 "[Burning Down the House](#)"

Actions BLC:

Nov-19: Greenpeace reports about allegations of deforestation in various location in Indonesia. Rachmat/Amara palm oil group is alleged to be involved in various fire incidents.

Oct-19: RAN reports about continuous deforestation of peat forests in the Leuser Ecosystem's Singkil-Bengkung Region, which includes the Rawa Singkil Wildlife reserve, the Singkil and Kluet peatlands, and the connecting lowland rainforests. The report lists 2 mills illegally growing palm inside the Rawa Singkil Wildlife Reserve and 11 mills, close to the Region, that risk sourcing from the Singkil-Bengkung region. Bunge requested its trade partners Musim Mas and GAR to require these mills to adhere to Bunge's NDPE requirements and to ensure a traceability system is in place. [GAR](#) confirmed engagement with the 2 mills from the report and require further field verification. They furthermore continuously engage with 7 other mills mentioned in the report to implement TTP. [Musim Mas](#) confirmed controlled purchasing of the 2 mills to ensure compliance with NDPE requirements and ongoing engagement with the other suppliers in the Region. Bunge continues to monitor their engagement and outcome of their TTP process.

Dec-18: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

Oct-18: Our trading partners have agreed a timebound action plan till year end with SPS2, until which failure to meet the milestones will result in an exclusion of SPS2 from Bunge supply chain.

Jul-18: Our trading partners provided an update on the progress made. We are pleased with the current steps undertaken by our trading partner and for more info see updates in grievance list trading partners May-18: for updates see grievance lists [GAR](#), [Musim Mas](#) and [Wilmar](#)

Feb-18: We have contacted our trading partners and requested for specific milestones

Aug-17: Based on conversations with our trade partners we expect more detailed communications on their grievance list the next months.

2017: IOI Group only sourced from these mills via its trading partners, IOI Group does not source directly from these mills. IOI has contacted its trading partners to ensure these suppliers become compliant with our policy. We expect our trading partners to set specific requirements for these suppliers to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with IOI representatives.

AUSTINDO NUSANTARA JAYA AGRI

Bruno Manser Fund

Sources:

[Borneo project](#)

[Article UNESCO](#)

Mighty Earth Report:

[13](#), [15](#), [16](#)

Actions BLC:

Jul-19: Double Dynasty is found to be non-compliant to the Bunge's NDPE policy. Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

Jun-19: Bunge requested its trade partner for further updates on the outcome of the field visit in March.

May-19: ME reports about deforestation of 22ha and clearance for preparation of 9ha in MPG plantation. Bunge reached out to its trade partners for further updates on their engagement with DD. Two of our trade partners suspended DD from their supply chain. One of them stopped purchasing since April, while engagement continues. A field visit was done in March and a follow up meeting to develop an action plan took place in April. Bunge continues to monitor the engagement process.

Mar-19: ME reports about deforestation of 98ha in the Radian Lagoon Sdn bhd concession. Our trading partner engaged with Double Dynasty Palm Oil Mill in February. A moratorium of land clearing is in place, while documentation evidences of Radiant Lagoon's operations is analyzed. Our trading partner scheduled a field visit for end March 2019.

Feb-19: Bruno Manser Fund reports that 4,440 HC near the Mulu National Park in Sarawak was deforested for palm oil plantations. Bunge's internal monitoring system show clearing close to the Mulu National Park 2017, 2018 and most recent in Feb 2019. Based on the latest news paper publications the deforested land in question belongs to local communities. Bunge will pro-actively engage its trade partners to verify their connections to the alleged area.

GRUPO HAME

Status: **Suspended**

Log Date: **November 2015**

Summary:

Human rights violations as reported by coalition of NGOs

- Report from a coalition of NGO's can be found here: [link to report](#)

Actions BLC:

Jan-20: REPSA published the Action plan of the Grievance mechanism audit and a first progress report via their [website](#).

Nov-19: based on the positive progress made on the milestones set in June Bunge developed additional, temporary, milestones to officially close the remaining gaps. Within the coming 6 months (per 1/1/2020), Bunge requires REPSA to:

- continue working with Earthworm foundation on implementing policy and GAPS
- successfully hire an Ethics manager
- publicly share a detailed bi-monthly report of community and NGO stakeholder engagement in the La Pasion river Region, including pictures, topics discussed, form of the engagement and future actions
- improve the frequency of reporting on grievances, including:
 1. publish monthly Grievance list updates
 2. publish the action plan from the Grievance mechanism audit (May 2019) including specific actions per section mentioned in the audit report and timeline for implementation
 3. publish monthly summary reports of the progress made on the actions from the action plan (including points 4.1-4.6 of the audit report)
 4. conduct an third party evaluation visit to verify the implementation of recommendations from the Grievance mechanism audit and publicly report on the outcome and actions of this evaluation visit

Oct-19: Bunge's Regional Sustainability manager directly engaged REPSA on the milestones set by Bunge. Bunge is satisfied with the progress made by REPSA:

- REPSA reports bi-monthly on the implementation of the actions from their Sustainability Action Plan. Annual action plans and accompanied progress reports have been shared since 2017. In 2019, 3 progress updates have been shared with stakeholders and are published in [REPSA's website](#);
- Environmental Impact Assessment, Social Impact Assessment and the Impact Management plan have been published on the REPSA [website](#);
- REPSA closely collaborates with local stakeholders in the Sayaxche region via its 's transparent [stakeholder mechanism](#). 18 workshops were held to consult local stakeholders on the impact of operations of Grupo Hame. (see [Progress Reports 2019](#) n.o. 1 and 2)

Last updated: 29-02-2020

- In March 2019 Earthworm Foundation (EF), consulting firm A Social License to Operate (ASLO) and Oxfam Guatemala conducted an audit on REPSA's Grievance Mechanism. Findings of the audit have been included in an Action Plan to close the gaps. Based on the audit results REPSA created a new position at Corporate level: Ethics Manager to oversee adequate functioning of the mechanism. [Audit Report](#) is published on REPSA's website.

Based on the 1:1 engagement with REPSA and consultation of various stakeholders Bunge is satisfied with most of the progress delivered to date. Hence, some additional temporary milestones will be set for REPSA to officially re-enter Bunge supply chain.

Jun-19: Bunge acknowledges the progress made by REPSA over the past years and engaged them to discuss the milestones for re-engagement. Bunge expects REPSA to:

- Seek agreement with local stakeholders on key milestones for resolution of the la passion grievance, i.e. remediation and/or other steps such as watershed management (regardless of the ongoing investigation on the June 2015 spill event). This can be in the form of an agreed action plan that includes:
 1. Transparent engagement and consultation process with affected communities and local organizations about the form of remedy
 2. Remedies provided should be in line with the UN Guiding Principles On Business and Human Rights
 3. Conduct EIA and publish results (if already completed: make results available and accessible to all stakeholders)
 4. Take the lead in watershed management in the Sayaxche Region
 5. Public quarterly report on implementation of Repsa's Sustainable Palm Oil Policy and Zero Tolerance policy
- Share results of the recent audit conducted on REPSA's grievance management and implement recommendations (action plan plus timing)
- Pro-actively report on progress (quarterly)

May-18: Bunge will no longer accept oil from REPSA and affiliated companies (Olemca / Grupo Hame), we have informed our trading partners and commercial team accordingly.

May-17: based our assessment we found Repsa to be non-compliant with our policy. We informed our trading partners accordingly.

2016: We have contacted our trading partners to ensure that REPSA becomes compliant with our policy. We expect our trading partners to set specific requirements for REPSA to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with our representatives.

Land clearing and labor violations

- Greenpeace report "A Deadly Trade Off" can be found [here](#)
- RAN / Aidenvironment report can be found [here](#)

Last updated: 29-02-2020

Actions BLC:

Mar-19: the RSPO Secretariat has terminated the RSPO membership of PT Salim Ivomas Pratama Tbk (SIMP) and PT PP London Sumatra Indonesia Tbk (PT Lonsum) for failure to undertake the necessary steps to comply with the decision of the RSPO CP of November. Press release can be found: [here](#)

Nov-18: RSPO complaints panel decision on Indofood locations PT PP London Sumatra Indonesia TBK (PT Lonsum) can be found: [here](#)

May-18: position remains unchanged. Following the new RAN / Aidenvironment report we have asked our trading partner about actions taken to address the allegations in relation to PT DRM and PT SKL and the neighboring mills (mentioned in the report) that might be confronted in the future with FFB from these two concessions. Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

We will review our position and consider allowing IndoAgri back in our supply chain once the following criteria are met:

- Agreement between IndoAgri and the complainants on a time-bound action plan with clear milestones to resolve the issues raised
- Completion of the independent field verification by RSPO
- Publication of the result of the independent field verification by RSPO including a management response from IndoAgri and remedial actions

Clearance of forest and peatland in Sarawak
Alleged deforestation

- Mighty Earth Reports: [5](#), [13](#), [15](#), [18](#)

Actions BLC:

May-19: ME reports about 214ha of forest that were prepared for clearance in Shin Yang Group. According to Bunge's engagement with SOP and information received from our trade partners, Shin Yang Group acts independently from SOP. SY Group is supplying to SOP. Bunge engaged with SOP and requested them to require SY Group to issue a stop work, pending next course of action.

Nov-18: we have engaged with SOP over the past 6 months and commend them on their sustainability initiatives and in adhering to the necessary assessments prior to any new expansion. We continue to seek further progress and milestones with SOP, specifically in establishing, publishing and socializing an NDPE policy.

Jun-18: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

Sep-18: meeting in Sarawak with industry and government officials.

Jul-18: meeting in Singapore with representatives of NGOs, SOP and other Sarawak producers

Jun-18: We have raised our concerns to our trading partners regarding Zedtee SB as a company owned by Sarawak Oil Palm.

Mar/Apr-18: Engagement with SOP regarding company's palm policies and activities

Apr-18: meeting with NGOs and investors

Mar-18: Received letter from coalition of NGO's dated March, 11 2018 regarding Sarawak Oil Palms (SOP). Received similar letter from investor dated March 18, 2018

SUNGAIBUDI

Status: **Suspended**

Log Date: **June 2018**

Summary:

- Greenpeace letter: "2020 NDPE policies"
- Mighty Earth Report: [19](#)

Actions BLC:

Sep-19: ME reports about 216ha of deforestation.

Aug-18: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

TH PLANTATION BERHAD

Status: **Suspended**

Log Date: **September 2016**

Summary:

Alleged deforestation and land clearing (Group level risk, IOI is not sourcing for the reported areas)

- Greenpeace report “A Deadly Trade Off” can be found [here](#)
- Mighty Earth Reports: [14](#), [15](#), [18](#)

Actions BLC:

Jun-18: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

May-19: ME reports about deforestation of 22ha.

May-18: position remains unchanged

Feb-18: Position remains unchanged, THP did not share an action plan for to address outstanding issues

Dec-17: IOI will re-engage with TH in January for progress update

Aug-17: See Grievance List Wilmar, next step depends on the Action Plan as Reported by Wilmar.

Jun-17: Grievance list Wilmar reports that TH has stopped new developments.

May-17: IOI had a constructive meeting with senior management from TH Plantations. The results of the field verification of Kota Bahagia mill and estates were discussed as well as the ongoing clearing of peat in TH’s Indonesian concessions. We appreciate the feedback and clarification given by TH including TH’s intention to continue clearing of peat areas. The latter is in conflict with IOI’s policy and therefore we continue the suspension of TH plantation from our supply chain

Apr-17: Based on our assessment we found TH plantations to be non-compliant to our policy. Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

Feb-17: We have informed our trading partners about specific requirements for TH Plantations to ensure they are compliant with our policy. We expect our trading partners to report progress on these requirements via their grievance lists or during meetings with our representatives

Nov-16: TH Plantations invited IOI for mill verification. TH and IOI have scheduled the mill verification for Mar-2017. IOI will contact senior management of TH once the report of the mill verification is available. In this meeting IOI will also address the other issues reported listed in our grievance list as well as milestones for re-engagement.

2016: On several occasions, IOI approached TH Plantations for an on-site mill and supply base verification. Since TH Plantations refused to collaborate, IOI decided to phase out TH Plantations from its supply chain.

UNISOURCE GROUP

Status: **Suspended**

Log Date: **September 2018**

Summary:

Alleged labor rights violations: not paying minimum wage

- [Reuters article](#)

Actions BLC:

Jul-19: Bunge received the information that Chiquibul was accused of a palm oil mill effluent spill in July 2019 in a river connected to the San Roman river. A similar situation occurred in March 2017, for which there was no resolution found at that time. Based on this recent allegation Bunge requires Chiquibul to also:

- Cooperate with government investigations and ensure that the results of these investigations are credible and shared with all relevant stakeholders.
- Take all appropriate and necessary action to remediate, if found to be responsible. Any plans for remediation should be designed jointly with affected communities.
- Build trust in the river area via joint water quality monitoring with communities and other local stakeholders.

Jun-19: Bunge engaged with Chiquibul to discuss milestones to demonstrate full compliance with Bunge's NDPE policy. Bunge expects Chiquibul to:

- Share evidence proper FPIC process, evidence of a labor and HR policy that applies to all workers (including contracted workers) and is properly communicated
- Share evidence of SIA, LUCA and HCV commitment and studies wherever applicable (recent / scheduled developments)
- Conduct an independent labor audit, executed by company specialized in local social and labor dynamics
- Share regular public communications of progress on elements listed above

Mar-19: our trade partner informed us Chiquibul did not meet crucial milestones from the action plan, including conducting an independent labor audit.

Jan-18: Bunge received payroll documents from Chiquibul indicating that the minimum wage is paid. Our trade partner confirmed a labor assessment is scheduled for Q1-2019. Based on these documents and the public statement made by Chiquibul Bunge is satisfied and will continue to monitor the engagement via its trade partner. The Chiquibul statement can be found: [here](#)

Dec-18: We contacted our trade partners for further updates on their engagement with Chiquibul. Based on the updates received, Bunge continues to monitor grievance list of our trade partner.

Summary:

Human and labor rights violations

- The report from Amnesty International can be found: [here](#)

Actions BLC:

May-18: for update see grievance list [Wilmar](#)

Feb-18: We have contacted our trading partners and requested for specific milestones

2017: we continue to follow the progress made via Wilmar's Grievance list.

2016: IOI has contacted its trading partners to ensure these suppliers become compliant with our policy. We expect our trading partners to set specific requirements for these suppliers to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with IOI representatives. Wilmar requested TFT to conduct the assessments.

ANGLO EASTERN PLANTATIONS

Status: **Monitoring**

Log Date: **June 2018**

Summary:

Alleged deforestation PT Kahayan Agro Plantation

- Greenpeace letter: "2020 NDPE policies"
- Mighty Earth Report: [1](#), [14](#), [15](#)

Actions BLC:

Last updated: 29-02-2020

Jun-19: AEP have published a commitment to no new development on HCS, HCV and Peat in their new [Sustainability Policy](#).

May-19: One of our trade partners confirmed there will be a verification visit to verify HCV and HCS assessment conducted. Early May our trade partners monitoring system detected indications of clearing. Given the ongoing peer review process in the HCSA committee our trade partner urged KAP to announce a stopwork order until peer review process is completed. AEP responded that a memorandum was issued to the KAP operation team stating that a Stop work order would be effective from May 27th onwards. AEP will furthermore publish an NDPE policy by end June 2019 at the latest.

Apr-19: ME reports about deforestation of 189ha in PT KAP. Bunge will engage its trade partner to verify the allegations from the report. Dec-18: Our trade partner confirms ongoing engagement. AEP plans to establish NDPE policy in 2019.

Nov-18: our trade partner confirmed HCS assessment done and will undergo peer review. AEP is in process of incorporating HCS commitment in Sustainability Policy. Our direct trade partner monitors PT KAP's activities on a monthly basis to ensure they will uphold their commitment to the moratorium.

Oct-18: Assessment results being socialized to community and employees. AEP reiterate commitment to HCS/HCV conservation.

Jun-18: Trading partners reported moratorium is in place and is undergoing a HCS study.

ASTRA AGRO LESTARI GROUP

Summary:

Allegations of deforestation in Leuser Ecosystem in Indonesia. (Aceh and North Sumatra)

The Leuser watch reports from RAN can be found: [here](#), [here](#) and [here](#)

Actions BLC:

Oct-19: RAN reports about continuous deforestation of peat forests in the Leuser Ecosystem's Singkil-Bengkung Region, which includes the Rawa Singkil Wildlife reserve, the Singkil and Kluet

Last updated: 29-02-2020

peatlands, and the connecting lowland rainforests. The report lists 2 mills illegally growing palm inside the Rawa Singkil Wildlife Reserve and 11 mills, close to the Region, that risk sourcing from the Singkil-Bengkung region. Bunge requested its trade partners Musim Mas and GAR to require these mills to adhere to Bunge's NDPE requirements and to ensure a traceability system is in place. **GAR** confirmed engagement with the 2 mills from the report and require further field verification. They furthermore continuously engage with 7 other mills mentioned in the report to implement TTP. **Musim Mas** confirmed controlled purchasing of the 2 mills to ensure compliance with NDPE requirements and ongoing engagement with the other suppliers in the Region. Bunge continues to monitor their engagement and outcome of their TTP process.

Dec-18: PT SPS II is no longer in the Bunge supply chain.

Oct-18: Our trading partners have agreed a timebound action plan till year end with SPS2, until which failure to meet the milestones will result in an exclusion of SPS2 from Bunge supply chain.

Jul-18: Our trading partners provided an update on the progress made. We are pleased with the current steps undertaken by our trading partner and for more info see updates in grievance list trading partners May-18: for updates see grievance lists GAR, Musim Mas and Wilmar

Feb-18: We have contacted our trading partners and requested for specific milestones

Aug-17: Based on conversations with our trade partners we expect more detailed communications on their grievance list the next months.

2017: IOI Group only sourced from these mills via its trading partners, IOI Group does not source directly from these mills. IOI has contacted its trading partners to ensure these suppliers become compliant with our policy. We expect our trading partners to set specific requirements for these suppliers to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with IOI representatives.

- Greenpeace [Final Countdown](#) Report

Actions BLC:

Nov-18: our trade partners confirmed HPG Group will undertake HCV&HCS assessment and look into legal compliance and SOP and NDPE policy. HPG Group agreed to a moratorium. We will continue to monitor our trade partners' engagement via their [grievance lists](#).

Oct-18: Our trading partners are together with Aidenvironment engaging with CCM/HPG Group to develop an action plan.

Jun-18: Undergoing HCV and HCS study. Based on the updates received, Bunge continues to monitor grievance list of our trade partner.

CIPTA

Status: **Monitoring**

Log Date: **July 2018**

Summary:

Alleged deforestation

- Mighty Earth report: [6](#), [17](#), [19](#)

Actions BLC:

Aug-19: our trade partner detected continued clearing in PT PMM location and contacted PT MM management. It was confirmed clearing will continue in line with the commitments made to [our](#)

Last updated: 29-02-2020

trade partner. (e.g. HCS/HCV studies, peer review of studies to HCSA/HCVRN, commitment to NDPE, verification visits, documentation of land clearing process)

May-19: our trade partner overlaid maps to determine if alleged clearing was in- or outside the HCS/HCV area identified in the assessment/studies. Result shows clearing is outside the HCS/HCV area. Link can be found: [here](#)

Jan-19: following the update on our trade partner's grievance list: result from the TFT visit: the land clearing in Blok II of PT PMM was carried out by a third party. The [executive summary](#) of the site visit report can be found on the [grievance list](#) of our trade partner

Nov-18: Our trade partner conducted a verification visit on PT PMM together with TFT.

Oct-18: our trade partner confirmed PT PMM is controlled by Cipta Plantation Group. It continues engagement with PT PMM on the indications of land clearing. Bunge continues monitoring our trade partners [Grievance List](#).

Jul-18: ME Report links PT PMM to Samuel International Group. Bunge contacted its trade partner to verify allegations.

DINANT

Status: **Monitoring**

Log Date: **January 2015**

Summary:

Alleged human rights violations

Reported by coalition of NGOs

Report can be found [here](#)

Actions BLC:

Oct-19: Bunge's Regional Sustainability manager directly engaged with Dinant on the milestones. Bunge is satisfied with the progress made by Dinant.

- Public reporting on the implementation of policies via their Progress Report 2019 on the implementation of Security and Human Rights program. Furthermore first company in its field to commit to implement the Voluntary Principles on Security and Human Rights.
- Dinant confirmed removal of all weapons of security guards. This commitment has been verified via visit of external stakeholders. Dinant developed a security policy and training program for security guards. Guards have been hired from nearby local communities.
- Dinant has done a lot of effort to facilitate the dialogue with peasant groups living in the communities, one example is the implementation of a Grievance Mechanism.
- Dinant improved relationships with communities via volunteering and CSR activities focusing on Health, Education, Environmental and Safety.
- A large team was installed to facilitate community engagement, safety, health and environmental efforts, and human rights compliance.

Based on the progress made, Dinant delivered on the Bunge milestones and suspension will be lifted.

Aug-19: Bunge acknowledges the progress made by Dinant over the past years and shared the following milestones for re-engagement:

Last updated: 29-02-2020

- Publically report on the implementation of updated Sustainability, Human Rights and Security policies in line with the voluntary HR and Security principles via dashboard/newsletters/progress reports
- Remove all weapons from Dinant's security guards, including the guards based in Tumbador, Paso Aguan and San Isidro plantations
- Engage with relevant stakeholders: e.g. local communities and NGO's supporting the peasant groups in order to open the dialogue.

Mar-19: our trade partner informed us that Dinant was invited as a speaker at a Human Rights forum organized by the British Ambassador for Honduras. Dinant presented on the significant progress they made over the past years in challenging parts of Honduras. News item can be found: [here](#)

Feb-18: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

2016: We have contacted our trading partners to ensure that Dinant becomes compliant with our policy. We expect our trading partners to set specific requirements for Dinant to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with our representatives. The trading partners informed us that TFT will conduct another verification visit in 2017.

Leuser Watch Reports RAN: [here](#), [here](#) and [here](#)

Alleged deforestation in Singkil Bengkung Peatlands

Actions BLC:

Jan-20: our trade partner published its action plan for the Leuser Ecosystem [here](#).

Nov-19: Musim Mas conducted a field verification visit. In general traceability is lacking, further findings are shared via the Musim Mas Grievance list. An action plan has been developed to develop a SOP on traceability to prevent from encroachment into protected areas.

Oct-19: RAN reports about continuous deforestation of peat forests in the Leuser Ecosystem's Singkil-Bengkung Region, which includes the Rawa Singkil Wildlife reserve, the Singkil and Kluet peatlands, and the connecting lowland rainforests. The report lists 2 mills illegally growing palm inside the Rawa Singkil Wildlife Reserve and 11 mills, close to the Region, that risk sourcing from the Singkil-Bengkung region. Bunge requested its trade partners Musim Mas and GAR to require these mills to adhere to Bunge's NDPE requirements and to ensure a traceability system is in place. GAR confirmed engagement with the 2 mills from the report and require further field verification. They furthermore continuously engage with 7 other mills mentioned in the report to implement TTP. [Musim Mas](#) confirmed controlled purchasing of the 2 mills to ensure compliance with NDPE requirements and ongoing engagement with the other suppliers in the Region. Bunge continues to monitor their engagement and outcome of their TTP process.

2017 Locations are alleged to be involved in clearing activities in the area of the Leuser EcoSystem. See for further details: Leuser Grievance

FELDA GLOBAL VENTURES HOLDING BERHAD

Status: **Monitoring**

Log Date: **April 2017**

Summary:

Allegations of continues clearance of peat forest in its PT TAA plantation in West Kalimantan, Indonesia.

Reported by Chain Reaction Research: Report
Mighty Earth report: [9](#)

Allegations of human right and labour abuses in Malaysian plantations FGV as first published by the Wall Street Journal in 2015: [Report](#)

Actions BLC:

Jan-20: Bunge is not directly connected to FGV. The developments of FGV and RSPO are closely monitored over the past months. Bunge takes note of the [letter of the RSPO complaints panel](#) including the requested milestones and timeline for FGV. Following Bunge's engagement over the past months, we do recognize FGV's progress on some of the milestones set by the CP. FGV published a [statement](#) on their website. Bunge is seeking clarification from trade partners on their position regarding FGV, while at the same time FGV is requested to share further details directly with the Bunge team in SEA. Bunge continues to monitor the developments and progress closely and will share any further updates via our Grievance list.

Aug-19: RSPO lifted the suspension on FGV's Seriting complex per 5th of August. Announcement can be found: [here](#)

Jul-19: FGV submitted its second [progress report](#) to the RSPO March 2019. Currently awaiting the response from the RSPO CP. Source: [RSPO Case tracker](#)

May-19: Bunge met with the FGV team to discuss the progress. FGV informed Bunge that a stop work order is still in place for PT TAA while awaiting recommendations from RSPO on the HCV/HCS assessments. FGV furthermore awaits feedback on their action plan and progress related to its suspended Seriting mill. Bunge continues to monitor the implementation of FGV's action plan.

Feb-19: FGV shared a first progress report in response to the milestones. The progress report indicates FGV's commitment to rectify all mistakes and shortcomings as identified by the RSPO CP and [immediate actions taken](#). FGV furthermore delivered a concrete action to apply the corrective measures across its entire supply chain. Bunge is satisfied with the progress made by FGV so far and will continue to monitor the implementation of the actions from the action plan. The progress report and concrete action plan can be found: [here](#).

Dec-18: Bunge abides to the decision and findings of the RSPO complaints panel decision. Based on the findings of the complaints, there are elements that need immediate attention. We have requested FGV to deliver on the below milestones within 3 months;

- Revamp housing conditions
- Contracts of workers in a language made understandable to all workers
- Allowing workers better terms to terminate their contracts
- Unnecessary deductions on workers' wages are abolished

FGV informed us that measures to address some of the milestones mentioned are already underway. We will closely monitor and see to it that they are fully implemented. Felda's public response to the RSPO CP decision can be found: [here](#)

Last updated: 29-02-2020

Nov-18: complaints panel decision to withdraw P&C certification of one FGV locations: Kilang Sawit Seriting and its supply base. The BLC team reached out to FGV directly to engage with them on the matter. The letter including the action plan to solve the issue related to this FGV location is published on the RSPO case tracker.

Oct-18: allegations raised of continuous clearing of peat area in concession PT Temila Agro Abadi, West Kalimantan. The Bunge team will continue its engagement with FGV.

May-18: FGV update can be found here more updates on grievance list of trading partners

Feb-18: PT TAA- FGV released quarterly progress update and tentative peat restoration Master Plan. Asian Plantations Ltd- Grand Performance FGV released statement that stop work order was issued on 8th January and in the process of initiating immediate HCS assessment. Relevant progress observed and our intel partner confirmed no clearing from nov-17 onwards. We will continue to monitor implementation of FGV's commitments and Master Plan
Previous updates on FGV under IOI Group can be found on the [IOI Group grievance list](#).

GENTING PLANTATION BERHAD

Status: **Monitoring**

Log Date: **June 2018**

Summary:

Alleged deforestation

- Mighty Earth Reports: [14](#), [15](#), [16](#), [17](#)
- [Mongabay](#) Article “Orangutan habitats being cleared in areas near palm oil mills” Source article: Forest Report [May 2019](#)

Actions BLC:

Nov-19: Bunge received information from Genting that HCV and HCS assessments are underway. Further engagement is ongoing.

Sep-19: ME reports about deforestation of 91ha in PT PSM. Bunge reached out to Genting for further updates.

Jul-19: Bunge was informed by Genting that there has been internal management approval to share CSC recent clearing verification results on the ground with stakeholders.

Jul-19: Bunge received a Maphubs deforestation report from Mongabay connecting Bunge to some of the mills mentioned in the report. None of the mills are in Bunge’s direct supply chain. We reached out to our trade partners to verify the connections and allegations on the indirectly connected mills. Based on the updates received we concluded the report contained lots of inconsistencies and wrong ownership connections. We therefore consider the case as closed.

May-19: ME reports about new deforestation of 175ha in PT Citra Sawit Cemerlang between March 17th and May 15th. Genting shared an official letter to inform Bunge a stop work order is in place.

Apr-19: alleged deforestation of 125ha in PT CSC. Bunge already engaged Genting and our intel partners to verify the allegations on PT CSC. Bunge requested Genting for a stop work order while assessment reports are clarified.

Oct-18: The BLC team received the confirmation from Genting Plantation that PT PSM has ceased to be part of their Group, after disposal in March 2017.

Jun-18: In March Genting disposed PT PSM. One of Genting’s JV partners is linked to PT PSM. The BLC team in Malaysia will ask Genting to address these allegations with their JV partner.

Status: **Monitoring**

Log Date: **June 2018**

Summary:

Alleged deforestation

Greenpeace letter: "2020 NDPE policies"

Report November 2019: Linkar Borneo

Actions BLC:

Dec-19: our trade partner met with HPI Group to discuss the pending cases. On PT GSK HPI reconfirmed it is committed to a land clearing moratorium since May 2018. Our trade partner and LinkAR Borneo detected land clearing after the moratorium and HPI followed up via verification that concluded: 2 out of 7 were outside GSK concession, 5 were conducted by estate management under pressure of farmers' cooperatives. HPI Head office will take all measures to ensure all estate management teams will implement moratorium.

Nov-19: Bunge received information about new clearing on PT GSK, indications of hot spots inside PT GKM as well as allegations of exploitation in PT KRS and PT PAS. Based on internal monitoring and research of our trade partner [an official statement of HPI](#) states that re. PT GKM no clearing/development was done in 2019. According to our trade partners observations, clearing took place in an area used by local communities for farming. HPI adopted a zero burning policy as part of its NDPE commitment. [Our trade partner](#) confirmed a follow up meeting with HPI on 3/12. Bunge will continue its engagement with its trade partner.

May-19: Our trade partner completed site visit and their review of NDPE policy. Follow up discussion HPI General management scheduled within one month. They will continue to monitor PT GSK to ensure no further HCS/HCV/Peat clearance. Site visit done to PT Buana Hijau Abadi as part of our trade partner's development programme.

Jan-19: a draft of HPI's NDPE policy was shared with our trade partner for review. We furthermore learned from other industry player's grievance list that a moratorium is in place for PT GSK since March 2018.

Dec-18: following engagement of our trade partner Djarum confirms publication of a NDPE policy by end 2018. The Bunge team continues to monitor the progress via the [Grievance list](#) of our trade partner.

Last updated: 29-02-2020

Jun-18: Based on the updates received, Bunge continues to monitor grievance list of our trade partner.

INCASI RAYA (GUNAS)

Pelita

Mar-19: IOI Group published 2 updates on the IOI Pelita land dispute resolution process. In February IOI launched the community capacity building stage to ensure affected communities understand the process. The process has been agreed upon by all 9 communities involved and is supported by RSPO CP and Grassroots. Detailed updates can be found [here](#).

Dec-18: The IOI Group Stakeholder engagement team met with the local government representatives in November to discuss the progress of the IOI Pelita dispute resolution process. Report of the trip can be found [here](#).

Oct-18: IOI Group and Grassroots published a joint statement on the agreed IOI Group Pelita Land dispute resolution process.

IOI Group responded to the inquiries regarding the latest Greenpeace Report titled "[Final Countdown](#)".

Sep-18: update from [RSPO website](#): IOI in the process of seeking consent of communities to the Resolution Plan.

Jul-18: IOI Group announced socialization of Resolution Plan.

Jun-18: IOI Group published update statement on Pelita.

May-18: RSPO update can be found [here](#).

Way forward:

IOI and Grassroots will work on dispute resolution plan (May-18)

Dispute resolution plan to be consulted with and accepted by 7 longhouses (Aug-18)

CP to approve dispute resolution plan (Aug-18)

Implementation Dispute resolution plan (Sep-18)

Last updated: 29-02-2020

Feb-18: IOI and Grassroots jointly engaged with RSPO to discuss comments CP on joint action plan. IOI and Grassroots will revise the joint action plan including the comments of the CP. The CP will review the revised action plan in their March (28th) 2018 meeting.

For updates on Pelita in 2017: please visit the IOI Group Grievance List or RSPO website.

PT KPAM

Oct-18: IOI Group partnered with Aidenvironment and Global Environment Centre (GEC) to officially launch the South Ketapang Landscape initiative. The initiative is a result of the IOI Group commitment to develop a collaborative way to tackle most common and critical issues within the ecologically diverse South Ketapang landscape.

Aug-18: investigation is ongoing. Bunge continues to monitor the [IOI Grievance list](#)

Jun-18: Aidenvironment raised concerns about land clearing activities conducted in and around PT KPAM, prior to and during the NPP was submitted. IOI respond to this concerns stating that activities were outside the northern end of PT KPAM boundary and it continue to tackle this issue in collaboration with authorities and other stakeholders.

May-18: HCS peer review assessment still in progress. Near real time satellite monitoring program continues and detected no deforestation and fires within the concession. PT KPAM employs a team of 5 full time fire and patrol staffs to monitor any illegal activity.

For updates in 2016-2017 please visit the IOI Group website and Grievance list.

KENCANA AGRI GROUP

Status: **Monitoring**

Log Date: **November 2016**

Summary:

- Leuser Watch Reports RAN: [here](#), [here](#) and [here](#)

Actions BLC:

Jan-20: our trade partner confirms PT BDA is not part of the Kencana Group.

Nov-19: RAN reports about the mill PT Bumi Daya Agrotamas who is alleged to be involved in the processing palm fruit from the Leuser EcoSystem.

2017-Oct-19: Kencana Agri Group locations are alleged to be involved in clearing activities in the area of the Leuser EcoSystem.

See for further details: Leuser Grievance

KWANTAS

Status: **Monitoring**

Log Date: **April 2019**

Summary:

Last updated: 29-02-2020

Alleged deforestation

Mighty Earth report: [14](#)

Actions BLC:

May-19: Bunge is indirectly connected to Kwantas Group. We will reach out to our trade partners for an update on their engagement.

Apr-19: ME reports that their satellite imagery shows that 5ha of forest were prepared for clearance. Bunge is investigating its connection to Kwantas.

LEUSER ECOSYSTEM

Status: **Monitoring**

Log Date: **January 2011**

Summary:

Allegations of deforestation in Leuser Ecosystem in Indonesia. (Aceh and North Sumatra)

The Leuser watch reports from RAN can be found: [here](#), [here](#) and [here](#)

Various companies including:

- PT Global Sawit Semesta
- PT Samudera Sawit Nabati
- PT Bumi Daya Agrotamas (Kencana Group)
- PT Ensem Lestari
- PT Bangun Sempurna Lestari
- PT. Perkebunan Lembah Bakti (I, II)
- PT. Bangun Sampurna Lestari
- PT Global Sawit Semesta
- PT Nafasindo / Uber
- PT Delima Makmur
- PT Surya Panen Subur II (SPS II)
- Muara Jambi Sawit Lestari

Actions BLC:

Jan-20: our trade partner published its [action plan](#) for the Leuser Ecosystem.

Oct-19: RAN reports about continuous deforestation of peat forests in the Leuser Ecosystem's Singkil-Bengkung Region, which includes the Rawa Singkil Wildlife reserve, the Singkil and Kluet peatlands, and the connecting lowland rainforests. The report lists 2 mills illegally growing palm inside the Rawa Singkil Wildlife Reserve and 11 mills, close to the Region, that risk sourcing from the Singkil-Bengkung region. Bunge requested its trade partners Musim Mas and GAR to require these mills to adhere to Bunge's NDPE requirements and to ensure a traceability system is in place. GAR confirmed engagement with the 2 mills from the report and require further field verification. They furthermore continuously engage with 7 other mills mentioned in the report to implement TTP.

Musim Mas confirmed controlled purchasing of the 2 mills to ensure compliance with NDPE requirements and ongoing engagement with the other suppliers in the Region. Bunge continues to monitor their engagement and outcome of their TTP process.

Dec-18: PT SPS II is no longer in the Bunge supply chain.

Last updated: 29-02-2020

Oct-18: Our trading partners have agreed a timebound action plan till year end with SPS2, until which failure to meet the milestones will result in an exclusion of SPS2 from Bunge supply chain.

Jul-18: Our trading partners provided an update on the progress made. We are pleased with the current steps undertaken by our trading partner and for more info see updates in grievance list trading partners

May-18: for updates see grievance lists GAR, Musim Mas and Wilmar

Feb-18: We have contacted our trading partners and requested for specific milestones

Aug-17: Based on conversations with our trade partners we expect more detailed communications on their grievance list the next months.

2017: IOI Group only sourced from these mills via its trading partners, IOI Group does not source directly from these mills. IOI has contacted its trading partners to ensure these suppliers become compliant with our policy. We expect our trading partners to set specific requirements for these suppliers to meet and communicate these requirements via their grievance list. We also expect our trading partners to report progress via their grievance lists or during meetings with IOI representatives.

MAHKOTA GROUP

Status: **Monitoring**

Log Date: **June 2018**

Summary:

Allegations of deforestation and encroachment in Tesso Nilo National Park Riau (Indonesia)

- The report from Eyes on the Forest (EoF) can be found: [here](#)

Actions BLC:

Nov-18: our suppliers confirmed ongoing engagement via ART programmes. In addition suppliers are working with EOF/WWF on finding a solution for the traceability challenges in Tesso Nilo National Park.

June-18: Bunge does not directly source from the mills or regions mentioned in the report, and we are working closely with our suppliers to address allegations related to indirect exposure. Our trading partners confirmed they do not source from the Tesso Nilo park and the surrounding National parks. Supplying mills to our trading partners (mills mentioned in the EOF report) have been visited by our trading partners and are undergoing the ART transformation program as well as a traceability to plantation program.

MAKMUR ANDALAN SAWIT

Status: **Monitoring**

Log Date: **January 2011**

Summary:

Allegations of deforestation and encroachment in Tesso Nilo National Park Riau (Indonesia)

- The report from Eyes on the Forest (EoF) can be found: [here](#)

Actions BLC:

Nov-18: our suppliers confirmed ongoing engagement via ART programmes. In addition suppliers are working with EOF/WWF on finding a solution for the traceability challenges in Tesso Nilo National Park.

June-18: Bunge does not directly source from the mills or regions mentioned in the report, and we are working closely with our suppliers to address allegations related to indirect exposure. Our trading partners confirmed they do not source from the Tesso Nilo park and the surrounding National parks. Supplying mills to our trading partners (mills mentioned in the EOF report) have been visited by our trading partners and are undergoing the ART transformation program as well as a traceability to plantation program.

NPC RESOURCES BERHAD

Status: **Monitoring**

Log Date: **December 2017**

Summary:

Alleged deforestation in PT Sumber Alam Selaras (PT SAS).

Mighty Earth Report: [23](#)

Actions BLC:

Feb-20: alleged fires in area indicated in the ME report was due to fires from outside the concession. Bunge received relevant evidence from NPC indicating that fires were unforeseen and spread into concession due to dry weather and wind conditions. Bunge's internal LUC analysis did not indicate any planned clearing prior to the fires. Appropriate fire mitigation and prevention measures were initiated and NPC reassures commitments towards protecting HCV. Furthermore, assessments will be submitted for peer review.

Jan-20: ME reports about deforestation of 23ha in the PT Sumbur Alam Selaras (PT SAS). Bunge received information from its trade partners that allegations are investigated.

Jun-19: Bunge acknowledges the progress made by NPC over the past months. NPC delivered on the following milestones:

1. Stop work moratorium in place
2. HCV and HCS assessments completed
3. Permanent canal blocking completed. Rewetting and natural regrowth of forest completed.
4. FPIC and verification of FPIC completed. Pending a completion of the FPIC report.
5. Commitment to conserve all peat areas.

Based on the milestones achieved so far and commitments made for continued moratorium, Bunge decided to lift the suspension on NPC. We will continue monitoring the implementation of next steps.

Nov-18: continuous engagement with NPC has led to a moratorium of land development, after which relevant assessments were conducted. The public statement from NPC can be found: [here](#). While Bunge commend this efforts thus far, our suspension remains while we seek further updates on:

1. Development of an internal sustainability action plan
2. Management plan post assessment including details on efforts to conserve cleared HCS/HCV areas.

Jun-18: We as Bunge are no longer sourcing from this company and have informed our trading partners accordingly.

Last updated: 29-02-2020

NURDIN TAMPUBOLON CORPORATION

Status: **Monitoring**

Log Date: **September 2019**

Summary:

Alleged deforestation

- Mighty Earth Report: [19](#)

Actions BLC:

Oct-19: Bunge is not linked to the mill mentioned in the ME report, but indirectly to NT Corporation via another mill owned by NT corp. We will connect with our trade partners on their engagement with NT corp.

Sep-19: ME reports about deforestation of 21ha. Bunge contacted its trade partners to verify its connection to this Group.

PACTRA

Status: **Monitoring**

Log Date: **April 2019**

Summary:

Alleged deforestation

Mighty Earth report: [14](#)

Actions BLC:

Feb-20: according to the latest information provided by our trade partner and intel partner, PT AUS is not connected to Borneo Pacific, nor to Pactra Group. Bunge is verifying its connection to PT AUS with its trade partner.

Jun-19: our trade partner verified the alleged clearing via in-house monitoring and [confirmed](#) clearing was outside the concession of PT AUS. Furthermore they informed Bunge PT AUS was sold to Borneo Pacific in 2018.

May-19: according to our data, Bunge is indirectly connected to Pactra Group. We will reach out to our trade partners for an update on their engagement.

Apr-19: ME reports deforestation of 33ha in PT Arjuna Utama Sawit (PT AUS). Bunge is investigating its connection to Pactra.

PALMA SERASIH

Status: **Monitoring**

Log Date: **March 2019**

Summary:

Alleged deforestation

Last updated: 29-02-2020

- Mighty Earth report: [13](#)

Actions BLC:

Jan-20: Bunge is only connected via one trade partner who continuous its [engagement](#) with Palma Serasih Group via its tier 1 supplier. We've requested this trade partner to share additional specific updates on their latest engagement with Palma Serasih Group.

Oct-19: our trade partner confirmed its engagement with Palma Serasih Group via its tier 1 supplier. According to a HCV assessment, completed in 2016, it was reported that alleged land clearance was outside HCV area. It was recommended to conduct a HCS assessment and continue to monitor their progress.

Jun-19: one of our trade partner's confirmed no connection to Palma Serasih Group.

Mar-19: ME reports deforestation of 102ha in PT GPM. Bunge data does not show PT GPM, but connection to another location of Palma Serasih Group.

PEPUTRA GROUP

Status: **Monitoring**

Log Date: **June 2018**

Summary:

Allegations of deforestation and encroachment in Tesso Nilo National Park Riau (Indonesia)

Dec-19: Our [trade partner](#) informed us that THA Group publicly committed to a [re-entry protocol](#). Based on their commitment to a group-wide moratorium, public NDPE policy and commitment to further requirements from the re-entry plan our trade partner decided to lift the suspension per November 2019. Bunge reviewed the information shared by our trade partner, as well as the re-entry protocol published on the THA Group. Based on the progress made by THA Group, Bunge will lift the suspension, while monitoring continues.

Jan-19: Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.

Dec-18: following updates from our trade partner they requested to declare a moratorium and conduct a HCS study at the alleged locations. As no satisfactory response has been received, our trade partner confirmed non-compliance of this supplier.

Jun-18: We have contacted our trading partners for clarification on their engagement with Tsani Hutan Abadi Group. We also expect our trading partners to report progress via their grievance lists. We continue to monitor their grievance lists.

WIDYA CORPORATION

Status: **Monitoring**

Log Date: **July 2018**

Summary:

Alleged deforestation

- Mighty Earth Reports: [6, 15](#)

Last updated: 29-02-2020

Actions BLC:

Jun-19: our trade partner carried out an analysis to make sure the land clearing mentioned in the ME report was outside the HCS/HCV area's as stated by PT MIP. According to their analysis the results show that the area cleared did not overlap HCS/HCV area's identified.

May-19: ME reports about deforestation of 119ha of forest and 46ha of forest prepared for clearance. Bunge contacted its trade partners to verify this allegations.

Oct-18: our trade partners confirm via their grievance lists that HCS and HCV studies at PT MIP were completed and are shared for review.

Aug-18: our trade partner confirmed that clearing in PT MIP concession is still taking place. A meeting was held with the management team of PT MIP. Following this meeting a stop work order was issued and HCV and HCS studies had been conducted. Peer reviews would be conducted by registered assessors. (HCSA and HCVRN)

Jul-18: We have contacted our trading partners for clarification on their engagement with Widya Corporation. We also expect our trading partners to report progress via their grievance lists. We continue to monitor their grievances lists.

WILMAR GROUP

Status: **Monitoring**

Log Date: **November 2016**

Human and labor rights violations

- The report from Amnesty International can be found: [here](#)

Allegations of deforestation and encroachment in **Tesso Nilo** National Park Riau (Indonesia)

- The report from Eyes on the Forest (EoF) can be found: [here](#)

Actions BLC:

May-18: for updates see [grievance list Wilmar](#)

Apr-17: Based on the BSR assessment provided by Wilmar, IOI is satisfied with the progress made so far. IOI continues to monitor progress via Wilmar's grievance list.

Mar-17: Wilmar to update IOI on BSR assessment
BSR conducted assessment, report due Feb-17. Due diligence audits performed on RSPO & ISCC requirements by independent auditors. IOI will monitor progress via Wilmar's grievance list.

Tesso Nilo NP

Nov-18: our suppliers confirmed ongoing engagement via ART programmes. In addition suppliers are working with EOF/WWF on finding a solution for the traceability challenges in Tesso Nilo National Park.

June-18: Bunge does not directly source from the mills or regions mentioned in the report, and we are working closely with our suppliers to address allegations related to indirect exposure. Our trading partners confirmed they do not source from the Tesso Nilo park and the surrounding National parks. Supplying mills to our trading partners (mills mentioned in the EOF report) have

Last updated: 29-02-2020

been visited by our trading partners and are undergoing the ART transformation program as well as a traceability to plantation program.

WOODMAN GROUP

Status: **Monitoring**

Log Date: **July 2019**

Summary:

Alleged deforestation

- Mighty Earth Report: [17](#), [18](#)

Actions BLC:

Aug-19: ME reports about peat development of 168ha and deforestation of 1ha. Bunge reached out again to its trade partners for further updates on the allegations in the report.

Jul-19: ME reports of 84 ha of peat development by 2 concessions owned by Woodman Group. Bunge investigates the allegations from the ME report.

WTK GROUP

Status: **Monitoring**

Log Date: **July 2019**

Summary:

Alleged deforestation

- Mighty Earth Report: [17](#)

Actions BLC:

Aug-19: one of our trade partners confirmed they are not connected to WTK.

Jul-19: ME reports about deforestation of 25ha in a concession owned by Southwind Plantations. Bunge currently investigates its connection to WTK group.

AHMAD ZAKI RESOURCES

Status: **Closed**

Log Date: **July 2019**

Summary:

Alleged deforestation

- [Mongabay](#) Article "Orangutan habitats being cleared in areas near palm oil mills" Source article: Forest Report [May 2019](#)

Actions BLC:

Jul-19: Bunge received a Maphubs deforestation report from Mongabay connecting Bunge to some of the mills mentioned in the report. None of the mills are in Bunge's direct supply chain. We reached out to our trade partners to verify the connections and allegations on the indirectly

Last updated: 29-02-2020

connected mills. Based on the updates received we concluded the report contained lots of inconsistencies and wrong ownership connections. We therefore consider the case as closed.

BAKRIE GROUP

Status: **Closed**

Log Date: **June 2019**

Summary:

Alleged deforestation by PT MML

Actions BLC:

Jul-19: our trade partners confirmed alleged concession is not part of the Bakrie Group. See: Annual Report 2018. Based on this evidence Bunge considers the case closed.

BUMITAMA AGRI LTD

Status: **Closed**

Log Date: **June 2018**

Summary:

Alleged deforestation

- Greenpeace letter: "2020 NDPE policies"
- Greenpeace [Final Countdown](#) report
- ME Report: [22](#), [23](#)

Actions BLC:

Jan-20: ME reports about deforestation of 129ha in PT Andalan Suskes Makmur. Based on the official response shared with Bunge in December 2019 the incidents were due to local people hunting in the area, using fire, that winds brought into the concession of Bumitama. This was the outcome of an independent party (Forestry and Environment Ministry) assessment. Further details can be found:[here](#). Based on this assessment Bunge decided to close the case on Bumitama.

Dec-19: ME reports about deforestation of 948 ha of peat forest by PT Damai Agro Sejahtera (PT DAS) a location of Bumitama. Bunge contacted its trade partner for more information. Based on the information received they state alleged deforestation was not committed by PT DAS. The [official response of Bumitama](#) states illegal logging activities in the conversation areas are suspected to be the lead cause of the fires. The activity has been reported to the policy and Bumitama commits to rehabilitate all conversation areas as part of the Bumitama Biodiversity and Community Project.

May-19: Our trade partner confirms Bumitama engaged a consultant to assist in the development of a rehabilitation plan for the area that was inadvertently developed.

Feb-19: We are engaging with our direct trading partners to verify the announced stop work order.

Dec-18: Our trade partners confirm continues engagement with Bumitama on the allegations made in Greenpeace Final Countdown Report. They met with Bumitama in October. Minutes of the meeting are shared on their [Grievance list](#). They will continue to monitor the progress. Statement can be found: [here](#)

Last updated: 29-02-2020

Nov-18: response from Bumitama to the Greenpeace report: “Dying for a Cookie” reiterating its commitment to its NDPE policy and adherence to the legal, regulatory, SGX (Singapore Stock Exchange)-related requirements and RSPO procedures. Following the GP report it will review the process of its acquisition method. Press release can be found: [here](#)

Sept-18: press release of Bumitama in response to the Greenpeace report “Final Countdown” reiterating the company’s commitment to its NDPE policy. Press release can be found: [here](#)

Jun-18: Based on the updates received, Bunge continues to monitor the grievance list of our trade partner.

DHARMA SATYA NUSANTARA

Status: **Closed**

Log Date: **November 2019**

Summary:

Alleged deforestation

ME Report: [20](#)

Actions BLC:

Jan-20: our trade partner informs Bunge that the issue with the different maps has been solved. DSN shared the maps with revised boundaries of PT Putra Utama Lestari and PT Prima Sawit Andalan with RSPO. RSPO published the revised boundaries. The matter has been solved to the satisfaction of ME. As a result, Bunge will close the case on Dharma Satya Nusantara.

Nov-19: our [trade partner](#) made overlay maps for the locations mentioned in the ME report, confirming alleged clearing was outside the concessions of DSN Group.

Oct-19: ME Reports about deforestation of 21 ha in 2 locations (PT Putra Utama Lestari 1/2) of DSN Group. Bunge investigates its connection to DSN Group.

EAGLE HIGH PLANTATIONS

Status: **Closed**

Log Date: **September 2016**

Summary:

Land clearing and no proper FPIC conducted as reported by Greenpeace

- Greenpeace report “A Deadly Trade Off” can be found [here](#)
- ME Report: [22](#)

Actions BLC:

Dec-19: ME Reports about deforestation of 109ha in the PT Arrtu Energie Resources (PT AER) a location of Eagle High Plantations. Bunge contacted its trade partners for further updates. Our trade partner informed us that the management of Eagle High published an [official statement](#), stating they remain committed to their moratorium and it has no intention to open any new areas for palm oil development. The fires have occurred outside of the concession areas and are caused by extreme weather conditions. EHP will take fire prevention and management measures as part of their SOP for fire management.

Last updated: 29-02-2020

Mar-19: Our trading partners informed us that Eagle High Plantations is committed to keep moratorium intact.

Dec-17: Followed up with Eagle High plantation sustainability team on way forward. Eagle High management team is now conducting internal FPIC training for its sustainability team in order to restart FPIC process for the community surrounding this concession

Oct-17: Loders Croklaan conducted a site visit to Eagle High's PT VMA concession upon invitation to understand the situation on the ground.

Eagle High has maintained its moratorium on new plantings; PT Varia Mitra Andalan in Papua has not been developed.

FIRST RESOURCES

Status: **Closed**

Log Date: **June 2018**

Summary:

Alleged deforestation

Alleged deforestation

- [Mongabay](#) Article “Orangutan habitats being cleared in areas near palm oil mills” Source article: Forest Report [May 2019](#)

Actions BLC:

Jul-19: Bunge received a Maphubs deforestation report from Mongabay connecting Bunge to some of the mills mentioned in the report. None of the mills are in Bunge’s direct supply chain. We reached out to our trade partners to verify the connections and allegations on the indirectly connected mills. Based on the updates received we concluded the report contained lots of inconsistencies and wrong ownership connections. We therefore consider the case as closed.

GOODHOPE HOLDINGS

Status: **Closed**

Log Date: **September 2016**

Summary:

Land clearing, no NPP Process, excessive use of force and no proper FPIC process as reported by Greenpeace

- Greenpeace report “A Deadly Trade Off” can be found: [here](#)
- Mighty Earth Report: [19](#), [22](#)

Actions BLC:

Dec-19: ME reports about deforestation of 39ha in PT Rim Capital. Bunge received information via its trade partner that one of the clearance areas is outside the concession. The other area cleared is within the PT Rim concession on community-owned land. Goodhope has no intention or plan to acquire the land. Based on the observations from the on the ground investigation team the areas were burnt by landfires. The [official statement](#) of Goodhope specifies the follow up actions of the company.

Sep-19: ME reports about deforestation of 35ha in PT Sumber Hasil Prima. Bunge reached out to Goodhope for verification. Goodhope confirmed they are investigating the allegations by deploying a team to conduct on the ground verification.

Oct-17: Reports by Goodhope and feedback from various stakeholders confirm that Goodhope has made relevant progress:

1. Released Sustainability Policy based on NDPE and supply chain traceability
2. Committed to Best Management Practices in relation to conservation HCS/HCV area’s. HCS assessment conducted in PT AJB, PT BMS and PT SMS. Reports presented to HCS Approach Steering Committee.

Last updated: 29-02-2020

3. Timebound action plan in place to achieve traceability to plantation level by 2019.
4. Committed to solve pending RSPO case via DSF RSPO.

Bunge is confident that Goodhope remains committed to the implementation of its policy and compliance to the Bunge Sustainable Palm Oil Sourcing Policy. We continue to monitor their progress via their monthly sustainability [updates](#).
